MANAGEMENT STRUCTURE

OUR SERVICES

01

GEOTECHNICAL & GEO-ENVIRONMENTAL

GEOTECHNICAL FORENSIC & ENGINEERING CONSULTANCY

IPC provide expertise in comprehensive investigation of geotechnical failures, geotechnical evaluation, stability determination and provides safe, cost-effective and sustainable engineering design and solutions

GEOTECHNICAL AUDIT

Through comprehensive geotechnical engineering and geological auditing process, to synchronize the consultant's design report and audit report hence establish quality assurance assessment and control to create safe engineering and sustainable solutions for proposed development projects

GEO ENVIRONMENTAL

Provide specialized geo-environmental consultancy services and solutions in environmental assessment, management and rehabilitation for wide range of projects such as River of Live, flood mitigation, road construction, slope remedial work etc that helps in minimizing the impact of urbanization towards the environment and strike the balance between social, economic and environmental concerns

GEOLOGICAL & GEOMORPHOLOGIC

Utilize LiDAR technology to survey large areas and GIS technology to produce various maps useful for land use planning and overall slope management. Geomorphology have helped engineers, planners, and attorneys from private and public entities better understand how the built environment will be impacted by natural processes

INSTRUMENTATION AND MONITORING

Apart from design and investigation works, we are also involved during the construction and implementation phases of a project, we provide geotechnical instrumentation and real-time monitoring services (before, during and after construction) in association with our affiliate companies

GEOTECHNICAL FORENSICS

INTEGRITY STUDY AT PINTU SUNGAI LOJI RAWATAN AIR SUNGAI LINGGI

Integrity study of Pintu Sg Loji Rawatan Air Sg Linggi and proposed remedial work of sheet pile fencing, to provide services required in the detailed design stage, tender and construction stage

SLOPE FAILURE INVESTIGATION AT CADANGAN SKIM BEKALAN AIR KUALA TERENGGANU UTARA BUKIT BERAPIT, KUALA TERENGGANU

Geotechnical forensic study to determine the cause of failure, the stability of the affected slope and to propose the suitable designs of strengthening measures for the slope

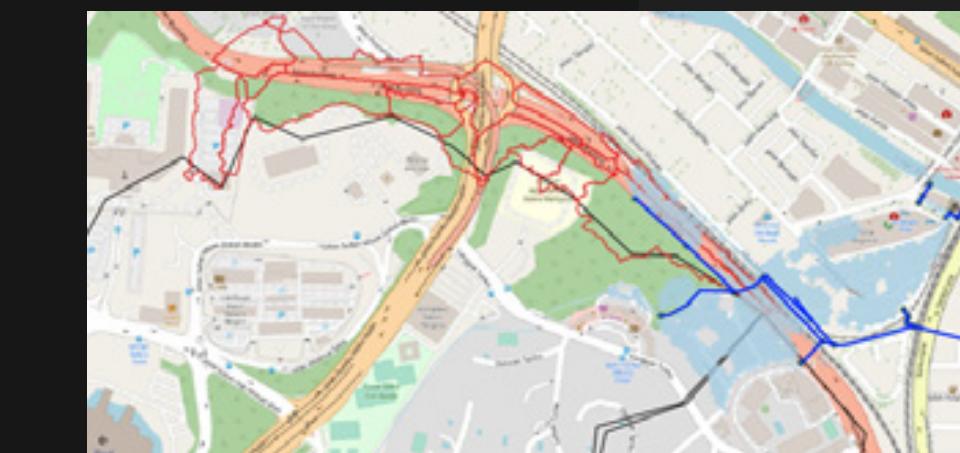

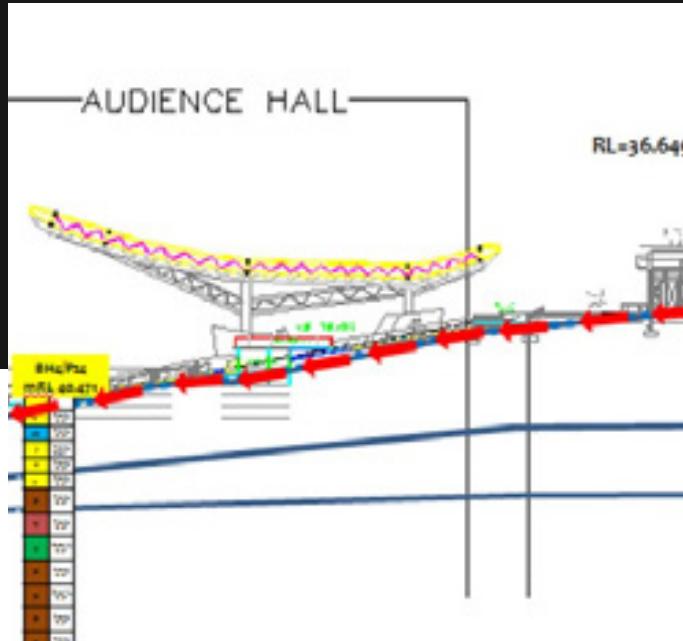

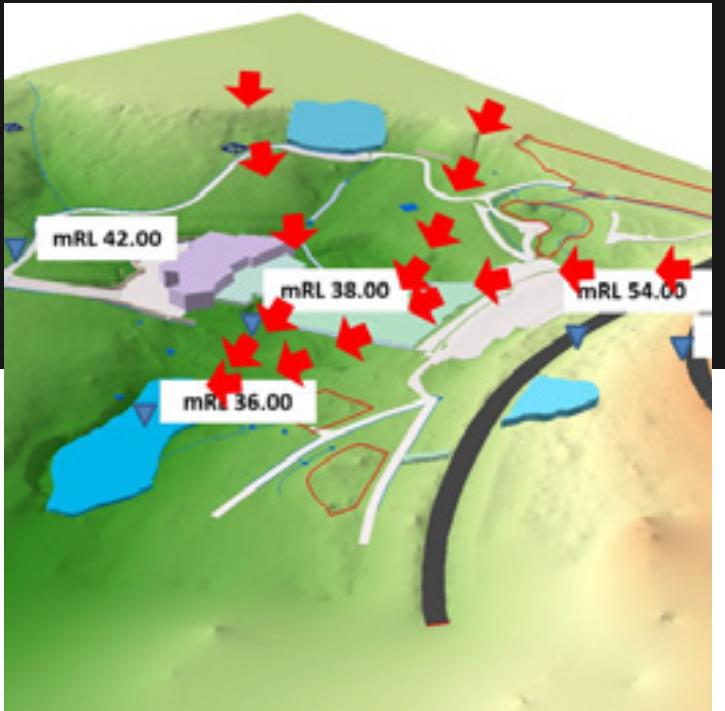

SLOPE FAILURE INVESTIGATION AT INSTITUT AMINUDDIN BAKI CAWANGAN GENTING HIGHLANDS, GENTING

Geotechnical forensic study to determine the cause of landslide, to determine the stability of the slope and to propose suitable methods for the slope remedial work

GEO-ENVIRONMENTAL

CADANGAN KAJIAN DAN KONSEPSI MITIGASI UNTUK BANJIR KILAT DI KAWASAN KUALA LUMPUR

In minimizing the impact of urbanization towards the environment and strike the balance between social, economic and environmental concerns by conducting a detailed study to identify the flash flood hot spot areas in Kuala Lumpur to investigate the problems and inadequacies and to formulate conceptual mitigation solutions to overcome the flooding, drainage, and stormwater related problems of the hot spots.

KAJIAN PENILAIAN SEMULA SEMBILAN KOLAM TAKUNGAN BANJIR DAN REKREASI SEDIADA SAMA ADA IANYA BOLEH MEMENUHI KEPERLUAN KOMPONEN DAN KONFIGURASI SEPERTI DITETAPKAN DALAM MSMA EDISI KEDUA 2012

Technical review on the retention and recreational ponds by verify all components and configurations for retention and recreational ponds

GROUNDWATER SEEPAGE STUDY AT PANGGUNG ANNIVERSARY KL

Groundwater seepage study by propose the suitable remediation technique approach for resolving a groundwater seepage problem

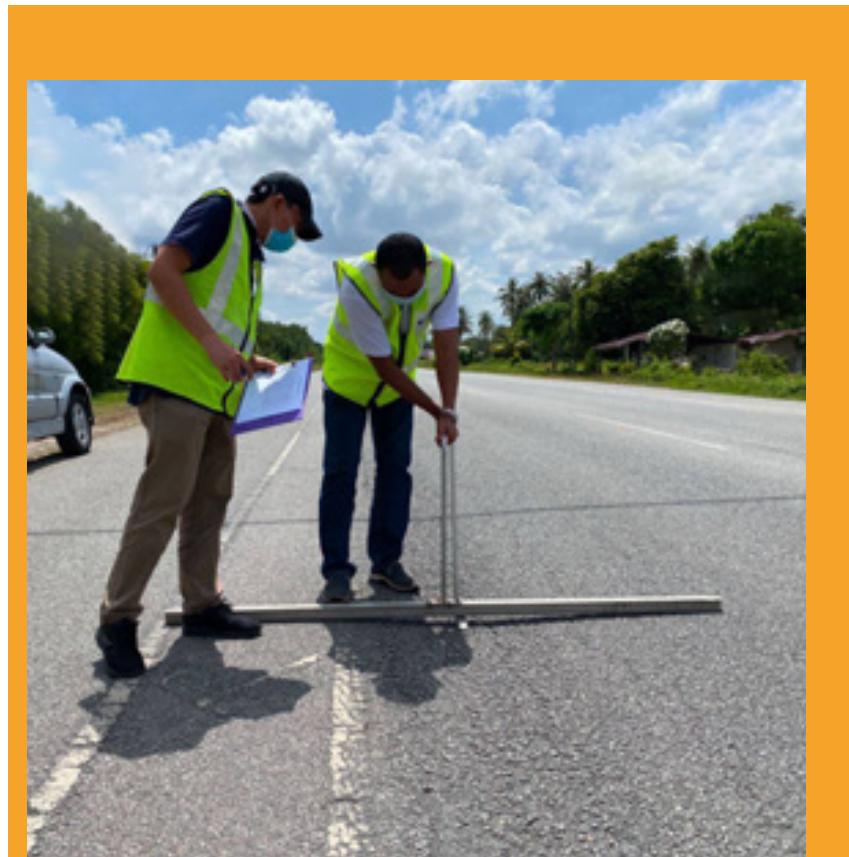

OUR SERVICES

02

PAVEMENT HIGHWAY & TRANSPORTATION

Adopting systematic approach in data gathering and understanding of the nature of the problems, we satisfy our clients in their needs for Highway & Transportation Engineering Consultancy services which include :

- PAVEMENT, HIGHWAY GEOMETRY & TRAFFIC ENGINEERING DESIGN – Providing engineering solutions employing advanced technologies and implementation strategies
- PUBLIC TRANSPORT PLANNING – Contributing solutions on public transport accessibility and service planning to meet the current and future demands
- ROAD SAFETY STUDIES – Research and review of international practices to introduce road management schemes that enhance road safety
- TRAFFIC SIMULATION MODELLING – Development of traffic simulation model that replicates current traffic flow which allow the future forecasting

- FEASIBILITY STUDY & TRAVEL DEMAND FORECASTING – Accurate forecasting of the travel demands on new and current road projects to determine the cost benefits to road users
- TRAFFIC IMPACT ASSESSMENT – Entailing assessment of the expected impact from the traffic generated by the proposed development to the road network and identifying solutions to mitigate any adverse impact

Well exposed the works standard & specifications, industry best practices and clients' requirement, we assist in delivering quality product and complying with traffic safety regulations through our services in :

- Construction supervision
- Traffic control & management plan

PAVEMENT FORENSIC & FAILURE INVESTIGATION

Dedicated team with specialized equipment is ever ready to be mobilized to determine the causes of pavement failures through comprehensive data gathering and analysis before any effective solutions to mitigate the problem can be proposed

NETWORK AND PROJECT LEVEL PAVEMENT ASSESSMENT

Network Level Pavement Assessment – Develop and maintain fit-for-purpose Pavement Management System (PMS) for roads and highways network in Malaysia or abroad

Project Level Pavement Assessment – Detailed project level pavement evaluation and rehabilitation design of existing pavements utilizing systematic and well established methods, including the Mechanistic-Empirical design tools and pavement recycling techniques

PAVEMENT AUDIT

Pavement Audit – Provide pavement audit services and quality assurance assessment and control to ensure compliance to the adopted standard and specifications
